Single Mode Optical Fiber Cable

Type: Central Unitube Armored Cable

A. Features:

- 1) Reasonable design and precise control over the loose-tube fiber in the remainder of a long, fiber optic cable with excellent performance and temperature tensile properties.
- 2) High strength loose tube that is hydrolysis resistant and special tube filling compound ensure a critical protection of fiber. Specially designed compact structure is good at preventing loose tubes from shrinking.
- 3) Specially designed compact structure is good at preventing loose tubes form shrinking.
- 4) Crush resistance and flexibility.
- 5) Two parallel steel wires ensure tensile strength, PE sheath protects cable from ultraviolet radiation.
- 6) Small diameter, light weight and installation friendliness long delivery length.

B. Structure:

The fibers, are positioned in a loose tube made of a high modulus plastic. The tubes are filled with a water-resistant filling compound. Over the tube, water-blocking tape is applied to keep the cable watertight. Two parallel steel wires are placed at the two sides of the steel tape. The cable is completed with a Polyethylene (PE) outside sheath.

C. Application:

Long distance and interoffice communication.

D. Laying mode:

Duct, Aerial
